

### Extend the Pool Swimming Season!

- Maximizes your investment
- 10 yr. replacement warranty
- Withstands hurricane winds
- Maintenance free
- Payback in ~ 2 years
- Most efficient solution
- Square flow channels
- Comes in three sizes

# Spacing Requirements

### Verify Space Requirements

HSE pool panels are 48" wide with a 3" gap between absorbers for mounting, totaling 51". Panels are placed next to each other in a row; each panel requires 51" horizontally. For example, (7) 4'x10' panels would be 357" horizontal by 120" vertical. Panel rows may be split to circumvent large obstacles, to install one row above another row, or to install on separate roofs. Each row requires a minimum of 3" on all sides to allow for feed and return plumbing. Using the previous example of (7) 4'x10' panels, the total length requirement would be 363". The chart below shows the typical system space requirements. The Total Length shown on the chart, includes the 3" on each side.

	Total Length
3 Panels	13ft 3in
4 Panels	17ft 6in
5 Panels	21ft 9in
6 Panels	26ft
7 Panels	30ft 3in

	Total Length
8 Panels	34ft 6in
9 Panels	38ft 9in
10 Panels	43ft
11 Panels	47ft 3in
12 Panels	51ft 6in
